**Describe the Structure** 50' Rountree tower to allow Nextlink internet service.

We're full time telework and need a reliable internet service for work.

The tower location is shown as a red circle next to the carport on the attached survey.

It should be well within the setback limits because the shed is farther out. I'll be back down on 12/10/2020 and can estimate the distance if needed.

Thank you.
